

# CODA Junior Drum Set Setup Instructions

**Congratulations on purchasing this CODA Junior Drum Set! This document will provide you with setup instructions to get you up and drumming in no time!**

## Bass Drum Assembly -

1) Place the drumhead with the CODA logo on the front side of the Bass Drum, the side closest to the spur brackets. Line up the CODA logo with the top of the drum. Place the Bass Drum Hoop over the drumhead, and hang the Claws on the Hoop. Make sure there is a washer on each of the Long Tension Rods. Then, insert the Long Tension Rods through each Hoop Claw into the Lugs (See Fig. 1). Hand-tighten each Tension Rod, then use the Drum Key to tune the drum to your desired pitch. Repeat this process to install head on the other side of the drum.

2) Insert the Bass Drum Spurs into brackets near the front of the drum. Hand tighten the wing screws to keep the Spurs in place. Insert the Tom Arms into Tom Mounting Bracket. Make sure to line up the Memory Locks and Wing Nuts so that they are facing outward for easy adjustment (See Fig. 2). Attach Tom Drums to Tom Arms and adjust to desired height. Insert the Cymbal Holder into the Cymbal Stand Mounting Bracket and tighten the wing screw. Attach Cymbal to the Cymbal Holder.

3) Assemble the Bass Drum Pedal by inserting the thin, flat plate into the base of the pedal. Remove the plastic covering from the Beater and insert Beater into the Bass Drum Pedal. Tighten the wing screw to hold it into place. Attach Bass Drum Pedal to Hoop of the Bass Drum. Tighten the wing screw to keep the pedal from moving (See Fig. 3).

## Floor Tom Assembly -

Place drumhead on top of Floor Tom and cover with the Hoop. Insert Short Tension Rods through holes on the hoop and into the Tom Lugs. First hand-tighten the Tension Rods, then use the Drum Key to tune the drums to pitch. Repeat this process to install head on the other side of the drum. Insert the Tom Legs into the leg brackets and tighten the wing screws.

## Snare Assembly -

Assemble the Snare Stand by placing the basket section into the leg section. Tighten the wing screw. Extend the tripod legs. Fold out the arms of the basket, and loosen the wing nut to adjust the angle of the stand. Place Snare Drum into Snare Stand with the clear drum head facing down.

## Finish -

Arrange the drums so that they can be comfortably reached while standing behind the bass drum. Now you're ready to play!
